

Chemical Pump Rebuild Service

Pump Rebuild Service Overview

ASSET Solutions chemical pump rebuild service for Trebor, White Knight and Wilden/Almatec pumps is an alternative to the high cost pump rebuild service offered by the OEM. Our chemical pump rebuild service includes disassembly, cleaning, component replacement and functionality testing. In addition, we stand behind each pump we rebuild with a twelve month warranty.

Pump Rebuild Kits

Prefer to rebuild your own pumps? We offer pump rebuild kits containing all the direct replacement components needed for your standard pump rebuild. Our pump rebuild kits are guaranteed to meet or exceed OEM specifications. However, our pump rebuild kits come at a fraction of the cost of those offered by the OEM, or their representatives.

Pump Return Data Sheet	
Prepare Pump for Transit.	
1	Cycle/Rinse pump with DI water for 15 minutes. Or, if pump will not start, force DI water in through the inlet port and direct the fluid from the outlet port down a drain.
2	Remove accessories, fittings, or attachments that are not part of the pump.
3	Double bag the pump.
4	Complete this form in its entirety and return with pump.
Pump Information
